CAR WASH SHAMPOO

Figure:1.1

Figure:1.2

Figure:1.3

Rxsol car wash shampoo is a new and exciting silicon base product treated for the really tough cleaning problem faced on the proper maintenance of automobiles our shampoo globules keep apart by mutual repulsion and are said to have been emulsified grease globules bearing dirt can be really washed with water Silicon base cleaner repels dust and soil from returning for people who take shine to quality

Features

Non streaking formula based car shampoo concentrate containing biodegradable surfactants, loosens the toughest dirt and gives gloss and shine car without affecting the paint or the polish of the car. It has a high foaming action and its formula has, been properly balanced to give sparkling, streak and spot free results. It contains water softeners and anti static compound which greatly reduce dust attraction. Add 25ml of wonder was Car shampoo in a bucket of water and apply it on the car and after some time wash with a sponge to give a ever lasting shine and gloss to your Car. Its basically a lavish spa for your automobile.

other Features

We have an assortment of car shampoo that enjoys extensive demand in the automobile industries. the shampoo is made of premium quality ingredients and hence, does not harm the paints and the metals of the car. gloss of the car is immediately restored after cleaning. These shampoos can be used for cleaning alloy rims and wheel covers also. Our range can also be used on all kinds of painted surfaces like scooters, refrigerators, painted doors and walls. more

CEMENT CLEANER PAINTED BODY

Figure:1.4

Figure:1.5

Figure:1.6

RXSOL Chemical Company developed this molecular cement dissolver as an alternative to using hazardous acids for concrete removal. Back-Set is a one-of-a-kind formula. It uses an active ingredient found in molasses syrup, and is completely biodegradable. RXSOL turned this vulnerability into an opportunity. "Back-Set" safely removes hardened concrete from a variety of difficult to clean surfaces. It break down the ionic bond in portland cement, releasing the cement from any surface to which it has adhered. Chemically speaking, Back-Set converts the positive ions in the hardened matrix into negative ions, which dissolves the cement into mud that can be rinsed away. Because it works chemically, rather than mechanically, Back-Set may be used to remove cured concrete, mortar, grout, and stucco from virtually any surface without harm.

Application

Active Matter Dissolves the cement into
MUD

68 - 72 %

USING PROCEDURE

The hardened concrete is saturated with Back-Set either with a brush or by spraying. After 15-20 minutes, the area is again saturated with the chemical. The concrete typically begins to soften in 20-30 minutes, and can be rinsed off with water.

Figure:1.7

Figure:1.8

Dose

Direct Spray / Dilution

Note

Directly Spray on HUNGRY SURFACE
will not remove rubberized cement

Features

- Biodegradable , Non-hazardous, Non-fuming
- Safe for paint, chrome, aluminum, glass, rubber, plastic , brass & stainless
- Dissolves cured cement , concrete , mortar , grout, stucco Cleans aluminum
- Also comes with a foaming spray nozzle

DUAL KA CLEANER

Figure:1.9

Highly effective on heavy deposition of many soils . A very strong cleaner, which can be used to soften up remove baked on drying oils also very ,... effective cleaner for Cleaning machinery, manufactured parts, engines , motors , conveyors, floors, and floor plates, machinery spaces etc .

TRAFFIC FILM REMOVER

Figure:1.10

This is an aqueous blend of surfactants designed for use in the cleaning of vehicles by hot or cold water pressure treatment excellent product for use in hot and cold pressure washing , equipment for , vehicle cleaning effectively removes grease dirt and traffic film with the minimum amount of agitation
